# ABOUT US

## About Flex Motion

Flex Motion is a company active in Europe and involved in the implementation of playgrounds and sports facilities, as well as in the sale of high quality materials used in the construction of such venues. We care about quality and reliable customer service.

The main area of our activity is the sale of the best materials for the construction of sports stadiums, playgrounds and other public utility facilities equipped with specialist surfaces. We offer only proven products - EPDM granules and SBR Recycling, as well as "virgin" granules, made of original rubber. On top of this, we sell finishing elements, used in the construction of artificial surfaces.

A secondary area of our activity involves execution of construction projects, which we carry out taking into account the planning and creation of facilities on demand, always applying the newest technologies and products of the highest quality. When we undertake a project, we choose products that are made in line with the safety approvals in force. When we take on a Client, we provide them with professional service, which encompasses the adaptation of the facility to the selected target group, the drafting of the necessary documentation and the relevant technical advice for the given project.

If you are looking for a firm to equip you with the necessary equipment for the construction of a sports facility or to execute for you the investments you designed, you are in the right place. We are a young and dynamic team of people who cooperate with the best architects, civil engineers and conservators from across Europe. Our products are used by contractors in, among others, Germany, France and the UK. We always provide assistance and offer our Clients favorable delivery and services conditions, and we will gladly provide advice regarding the execution of a construction project.

When you cooperate with our firm, fast execution turnaround and a precise execution of the project are guaranteed, and we also ensure that the products and the facilities delivered by us will have the highest standards and will serve for years to come.

---

## BEYNON's systems

FLEX MOTION is the exclusive representative on the Polish market of the US company Beynon. Beynon is a world leading producer of outdoor and indoor sports surfaces. Years of experience, and the quality of the products offered by Beynon ensure successful investments in the sports construction sector. Products made by Beynon are a synonym of specialized solutions of the highest quality. As official and direct distributor we maintain the prices at attractive levels, which allows us to stay ahead of our competition.

# Ship

One venue, with numerous games that can be played.

# Field

Safe beginnings.  
First steps towards professionalism.

# Basketball

Unlimited possibilities of integration of smaller multi-purpose fields.

# Springboard

Interesting, high, safe. It's always clearer when you look down from up above.

## PROFESSIONAL ADVISORY AND EXECUTION SERVICES

in the field of construction of sports and recreational facilities

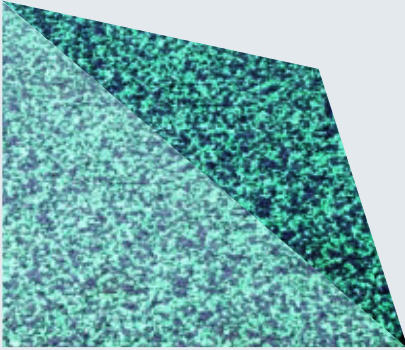

## ADVISORY SERVICES IN THE FIELD OF SELECTION

of materials for the sports surfaces

## ADVISORY SERVICES AND EXECUTION

of sports and recreational facilities

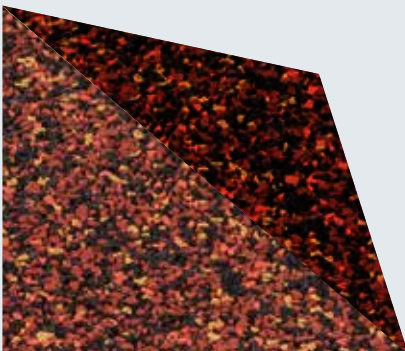

## SBR RECYCLING

SBR Recycling granules - first-rate material used in sports surfaces. SBR granules are environment-friendly because they are made from production waste. They are most commonly used as substrate or the lower layer of surfaces for sports fields and recreational facilities, and sometimes also as filler for artificial grass.

### PARAMETERS

- resistant to outer factors (sun, cold, rain)
- impervious to moisture
- flexible, ensures cushioning
- resistant to mechanical effects
- wolny od szkodliwych związków toksycznych
- absorbs sound waves

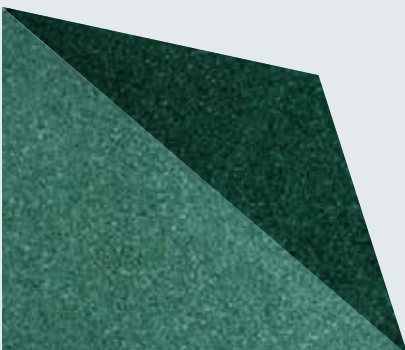

## MULCH EPDM

Mulch EPDM is an alternative to the so-called colored surface-coated plastic raw materials made from used tires. Whereas Mulch EPDM is thoroughly 100%-colored, which allows it to maintain its color for longer periods of time. It is also harmless to health and environment-friendly. Surfaces with Mulch EPDM are easier to be kept clean. Uniform, smooth and cast-in-place Mulch EPDM surface has no connectors, thus ensuring safety while playing.

### PARAMETERS

- safe
- resistant to harmful outer factors
- stable and 100%-colored
- environment-friendly and harmless for health

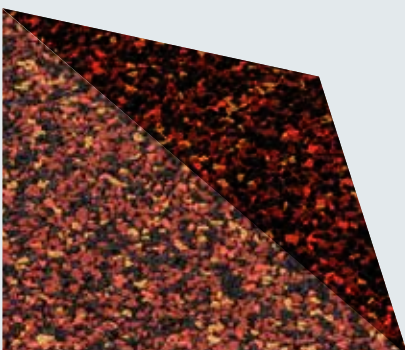

## EPDM VIRGIN

Made based on unique recipes - colored tread compound based on EPDM rubber with the addition of chalk, oil and other relevant chemical agents. The granules are used as a durable and flexible surface layer for outdoor and indoor surfaces, resistant to environmental influences and UV radiation. EPDM VIRGIN granules offered by us are products of the highest quality produced within the EU.

### PARAMETERS

- resistant to environmental influences
- does not absorb water
- UV resistant

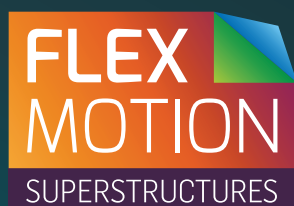

## EPDM RECYCLING

Thanks to the application of high-quality used recycle materials, i.e. technical waste from the manufacture of elements in the home appliance and automotive segments, the granule is similar in quality to the EPDM VIRGIN granule. EPDM RECYCLING granules are used as durable and flexible surface layer of outdoor surfaces. EPDM Recycling granules offered by us are high-quality products manufactured within the EU.

### PARAMETERS

- no harmful substances, in contrast to granules made from used car tires
- resistant to environmental influences
- has properties similar to the EPDM VIRGIN granule
- absorbs sound waves
